Oil Well Tubing.

This Superior Tubing is furnished with heavy suckets, and is cut with a vanishing screw thread, corresponding exactly with the thread in the rucket, so that when acrewed up it has a bearing the whole length of the joint; and the absence of a deep thread on the tube at the said of the socket obvates the liability to break at that point from the vibration caused by the action of the pump.

Hack length and seeket is stamped with our trade mark, and is carefully tested before shipment with a hydraulic pressure of 1,300 pounds is the square inst.
